

Towngas takes home ten Occupational Safety & Health Awards

(12 February 2023) The Hong Kong and China Gas Company Limited (Towngas) won ten awards at the 21st Hong Kong Occupational Safety and Health Award (OSH Award) organised by the Occupational Safety and Health Council, breaking the previous company record. Towngas won four Gold Awards in OSH Innovative Award and Best OSH Video Performance Award, among others, with its innovative inventions and ideas, such as the FollowMe Robot and the Pipe Lifting and Handling Equipment. Also, It was the first time Towngas won the top prize in OSH Enhancement Program Award for consecutive years, fully recognising our occupational safety and health performance.

A total of 241 organisations participated in this year's OSH Award, with Towngas winning ten awards in various categories (see separate table), including Gold Awards in OSH Enhancement Program Award, OSH Innovative Award, Best OSH Video Performance Award and OSH Annual Report Award, the highest number in the Company's history.

The FollowMe Robots introduced by Towngas can automatically follow our staff and work with them, eliminating the need for them to use manual pallet jacks. With the Pipe Lifting and Handling Equipment, the platform height can be adjusted according to the weight of the pipes, so that the platform remains at the waist level of the operating workers, significantly reducing the number of times they have to bend down to handle the pipes. Also, the Self-Developed VR Training Kits can provide tailor-made virtual reality training to staff. With the implementation of these innovative technology projects to eliminate occupational safety risks in warehouse operations, Towngas was awarded the Gold Award in the OSH Enhancement Program Award for the second consecutive year.

By providing comprehensive protection and establishing a safe and healthy working environment for the staff, various departments and subsidiaries of Towngas were also recognised at the OSA Award.
