About The Hong Kong and China Gas Company Limited (HKCG)

HKCG was founded in 1862 – the first public utility to begin operations in Hong Kong. Initially established to light up the streets of Hong Kong, our business in the territory today consists of the production and distribution of town gas, its marketing and sale, the provision of a full range of gas appliances, as well as comprehensive after-sales services.

Expanding into the mainland in 1994, our businesses in China include upstream, midstream and downstream gas projects, ranging from city-gas to natural gas storage, distributed energy system, gas transportation and vehicular gas refilling station projects. We have also diversified into telecommunications, building services, water supply, wastewater and food waste treatment, among others. In the past few years, in line with our vision to become a major energy supplier with an environmentally friendly focus, we have seen investment into new and unconventional energies, with projects ranging from the utilization of landfill gas to conversion of low value feedstock or wastes into high value clean energy and materials, emphasizing on self-developed green technologies.
