

Low Carbon Action!

Reduce One Million Tonnes of Carbon Emissions

**Reduce Your Daily Carbon Emissions
Enjoy the Green Life Ahead**

According to the Environmental Protection Department, every Hong Kong resident emits an average of 6.7 tonnes of carbon dioxide every year, further aggravating the global warming problem. To protect our Earth, we must take action now and lead a low-carbon lifestyle.

As a clean, low-carbon energy supplier, Towngas is committed to protecting the environment. We have reduced the emission of carbon dioxide substantially with the introduction of natural gas and the use of landfill gas in the production of town gas. Making an additional effort to improve our living environment, we now invite you to join our "Low Carbon Action" incentive - all you have to do is to follow the measures below to reduce your carbon footprint. Visit www.towngas.com/lowcarbonaction and pledge to join our action. Not only will you be making a difference, you will also have the opportunity to win some fabulous prizes.

Take action now! Just a few small changes in your everyday life will make a big contribution to the environment. Let's work together to save our planet!

Greening up your life

Flame cooking for **1** meal

The production of town gas releases less carbon dioxide than other energy options. Flame cooking at home thus reduces carbon emissions compared to other non-flame alternatives.

Shorten your shower time by **1** minute

An average shower in Hong Kong takes 18 minutes. Reducing its time saves both water and energy consumptions.

Be a vegetarian for **1** meal

Rearing cattle releases high amounts of carbon dioxide into the atmosphere. Replacing meat with vegetables several times a week not only reduces carbon emissions, it also translates into a healthier lifestyle. Eating food produced locally also saves fuel and lowers emissions accordingly.

Take **1** bottle of water with you

Bring a bottle of water with you when you go out. Avoid consuming bottled water reduces the use of plastic bottles, saving resources, lowering carbon emissions, reducing waste and pressure on landfills.

Spend **1** hour less on the computer

Whether you are in the office or at home, remember to switch off - lights, the computer or other electrical appliances, when they are not in use. Even the standby mode consumes energy.

-137g
CO₂

Travel by public transportation for **1** trip

Use public transportation. This convenient and effective means of travel reduces the number of vehicles on the road, saves fuel and lowers carbon dioxide emissions.
